JIT PHARMA COMPANY PROFILE

Chairman Speech

JIT depends on products diversity and the people that produce them: our sourcing promotes stability for producers, clients and the local environment. We call this Sourcing for Shared Value as it brings new value to those involved in the sourcing of our raw materials. It is based on three practices.

Responsible Sourcing means precisely selecting suppliers and assessing supply chains to work with our suppliers on driving compliance and continuous improvements against norms in health and safety, social, environmental and business integrity practices as defined in our Responsible Sourcing Policy.

Sourcing at Origin focuses on direct collection networks and partnerships with all producer groups. It secures the long-term and balanced supply of ingredients from fragile ecosystems while boosting the local economy through knowledge transfer and more stable incomes.

Social and environmental projects help build more secure futures for the Communities at Source and their environments. Together, these three practices move us closer and closer towards our goal of sourcing all materials responsibly.

Today, Sourcing for Shared Value covers +100 raw material from more than 20 countries. that serves more than 100 beneficiaries from national, multinational sectors as well community.

Our target is to enhance the dimensions of performance quality by working on licensing a giant warehouse and best use of our technical supports and standard strong documentation system that is comply with both customers and regulators requirements.

2.1COMPANY AND PRODUCT OVERVIEW:

JIT Pharma Launched in 2012 as an independent company in Egypt representing manufacturers for pharmaceutical products (API's, excipients and coating colors), herbal products, food, feed additives, cosmetics and industrial raw materials. Also, we are supplying Hard gelatin capsules (HGC) & HPMC capsules with different sizes (printing and un-printing). In addition, we are supplying different types of primary pharmaceutical packaging materials according to high standard qualifications. **JIT Pharma** – a young and dynamic company, having gathered collective experience in the pharmaceutical, food, feed, industrial and cosmetic industries on the basis of our products and professional work force covering the whole Egyptian market, we have good contacts, wide network & regular supplies.

JIT Pharma – with continuous efforts, and strict adherence to the quality and the policy “To provide products and services of the highest standard at reasonable cost to satisfy the customer’s present and future needs and expectations of quality, safety, reliability and service has added names of number of national and international customers to the clients list.

JIT Pharma – today comprise a suite of value added products developed on leading business practices that ensure responsiveness to customer needs and Continued customer service & support.

Mission

Our mission not only distribute raw materials but also offering a complete technical package, samples, documents, competitive pricing and on-time deliveries which is our name Just In Time (JIT).

Our mission is to continuously develop and offer premium quality products and first-class service to our customers at reasonable prices, Our clients are the most important part of our business and their appraisalment is our core itinerary.

This is the core idea of our company's strategy, and by strictly following this path, we are confidently aiming to achieve a further global sales expansion and stable corporate growth.

We assume that this mission couldn't be achieved unless we make sure that we maintain ethical and transparent relations with our subcontractors, distributors and clients in all the countries where we are present.

A sustainable and steady supply chain is the foundation to achieve a win-win relationship with our customers and partners. Therefore, we are devoted to maintaining a sustainable supply cha

Technical support

A team of technical professionals with extensive experience in pharma, food, feed, industrial and cosmetics industries are committed to deliver a technical support with stringent quality standards, offering formulation and analytical development consultations for new products being developed to required specifications and documentations. Focused on attaining a unique position to serve the ever – growing needs of the targeted industry globally.

JIT Pharma – is a highly committed customer-focused company and our dedication to quality and perfection is second-to-none, all our operations are driven towards business excellence offering clients a one-stop-shop for specialty bulk ingredients that are used in various challenging applications, in a variety field.
